# This Book Belongs To

---

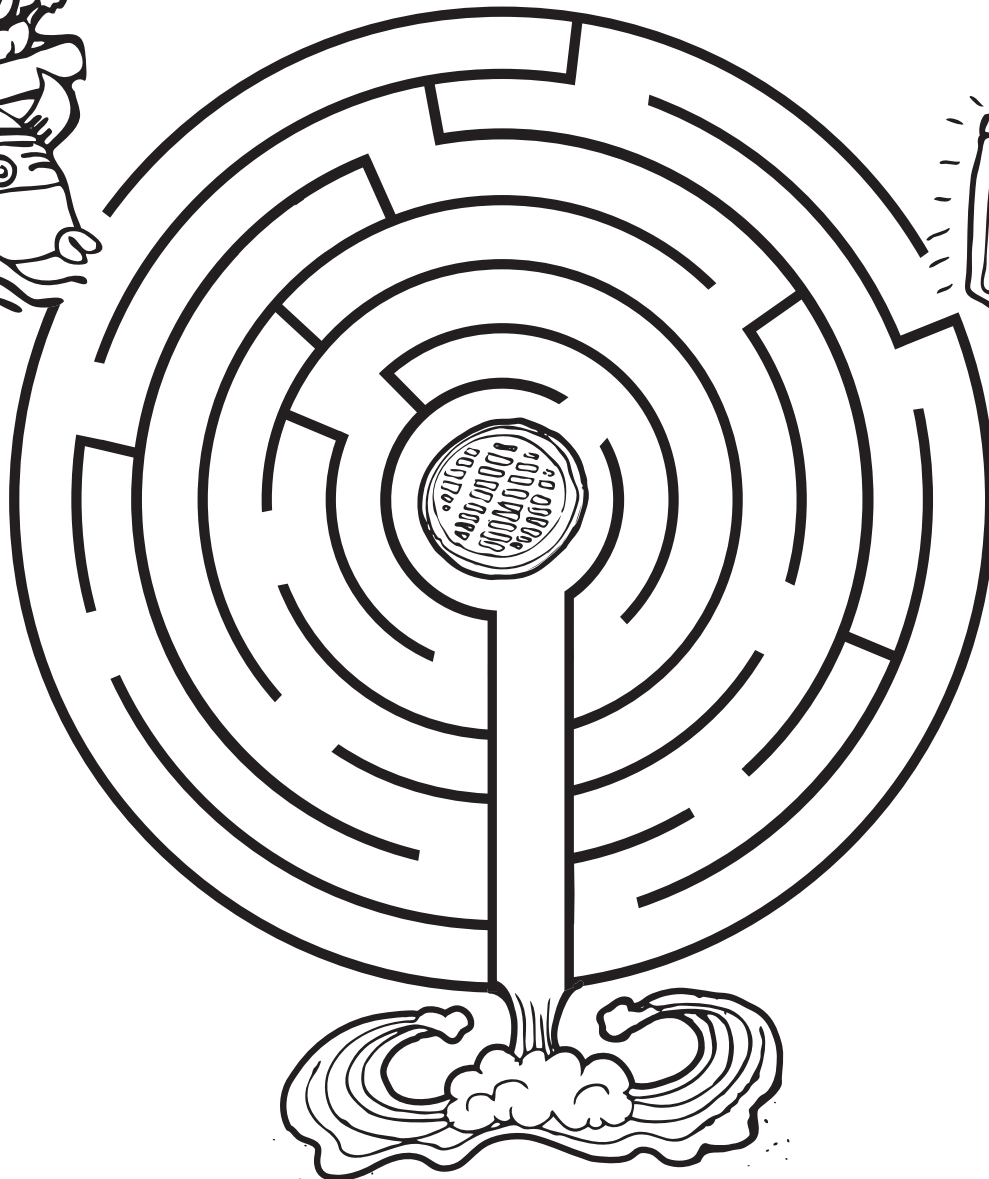

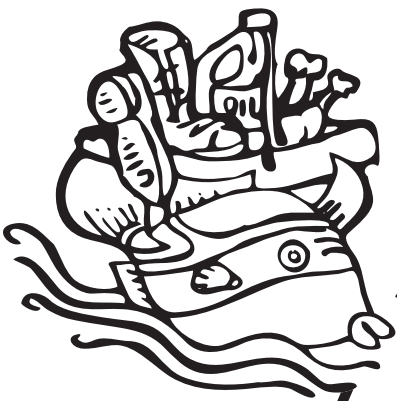

Thank you for caring about me and my ocean home. Please write your name on the line above. This is your personal activity book, but please share what you learn with your family and friends.

# Help Mālama Put Trash In Its Place

**1** While playing in the coral reef, Mālama noticed that there was a lot of trash around. Auwe! So, being an akamai fish, Mālama put all the trash in a box and looked for the trash can. But when Mālama found the trash can, it was on the land!

**2** Can you help Mālama by putting the trash into the trash can? Draw a line through the maze from the trash to the trash can. But be careful. If you put the trash down the storm drain in the center of the maze, it will take the trash back into the ocean and Mālama will have to pick up the trash again.

Can you identify all of the trash that Mālama found in the ocean?

## Everything is Connected

As you color the drawing, see how the land and ocean are connected. Storm drains play an important role in that connection.

If we take care of the ocean, everyone will benefit. Keep in mind that whatever you put in the storm drain will go directly into the ocean. Even trash on the sidewalk can be washed down the storm drain when it rains.

# Good Job!

You've finished the  
**Stick It to Storm Water Pollution**  
activity book! You've learned  
a lot about keeping our waters –  
and my home – clean!

**PROTECT  
OUR WATER**
